

**1 IN 10** → Your chances of getting into med school.

**Higher** → Your chances of getting a job immediately upon graduation if you have a biology major/computer science minor combined degree as opposed to having a biology degree only.

**Limitless** → Ways you could use a computer science background in biological fields, for example: medical imaging, robot assisted surgery, genome sequencing, monitoring pacemakers.

**Priceless** → Creating software that will save someone's life.

The first step is to take Computer Science 1026a/b and see what opportunities computer science can create for you.
